PROJECT WORK/ training

- **Rails 4 conversion for existing applications**

  Kreatio Softwares, Bangalore (1 year exp.)   **(Jan – June 2014)**

  This conversion was carried out for our client 9dot9 in sites like itnext, cio leaders, igov etc. The conversion required changing of old rails syntax (Rails 2 and 3) to Rails 4.1 along with the removal of deprecated gems and code. It also included the upgrade in version for jquery from 1.7 to 1.11.

- **Unquote Data (Incisive Media)**

  Kreatio Softwares, Bangalore (1 year exp.)   **(Sep 2013)**

  The project consisted of making a content management system such that the front end of the website www.unquotedata.com could be controlled with what we call as a backoffice, which is nothing but a normal dashboard, where a user can enter the required data. This being my first live project, was surely a good learning experience.

- **Investor Source**

  Kreatio Softwares, Bangalore (1 year exp.)   **(Oct 2013)**

  For this project , I was allowed to do the full frontend implementation of the website. The design was already provided along with some APIs provided. I had to fetch data from the database and write ruby methods for the implementation of the design.
